

Units shown with options.

Basic Single-Side Starter Unit Includes:
 2 Uprights
 2 Legs
 1 Worksurface & Filler
 1 Beam Set

Basic Double-Side Starter Unit Includes:
 2 Uprights
 2 Legs
 2 Worksurfaces
 1 Beam Set

IAC Kinetechnics System 1

- Heavy gauge steel construction
- Easy, multi-bench inline configurability

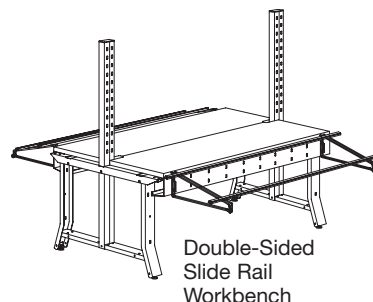

The System 1 is available in single- or double-sided versions. Use it as a stand-alone bench or connect add-ons for an "in-line" series of benches. Cold-rolled, 12-gauge steel construction and H-leg design make these workbenches truly heavy-duty and capable of supporting a 750-pound evenly distributed static load. Worksurfaces are 1-1/4" thick, high-density particleboard, finished with high-pressure laminate and have a 180° rolled front edge for comfort. With the leg extension option (P/N 60009), the worksurface height is adjustable to 30, 33 or 36 inches. A built-in upper structure is slotted in 2" increments making addition of shelving and lighting a snap. Standard paint colors are Cerulean Blue with KT Ivory accents; laminate colors are Ivory Kid (standard) or Beige (ESD).

Single-Sided System 1 Workbench

Double-Sided System 1 Workbench

Double-Sided Slide Rail Workbench

System 1 Starter Workbenches

Model	Length	Laminate	
		Std.	ESD
